

Antares is the 15th brightest star in the sky. It is more than 1000 light years away.

When multiple Hollywood types were asked 'What is the purpose of life?' many gave the usual answers, to do good, etc.

So it is with this amazing comparison of bodies in the universe. Our significance comes not from our size but that evolution created it.

The universe is so vast it is not comprehensible by the human mind. It would be like an ant trying to understand the wonders of the internet. It can't be done.

The universe humbles us, as it should.
